Object Oriented Programming Concepts

```
class BIT{  
    public static void main(String[] a){  
        int x = 10;  
        System.out.print(x);  
    }  
}
```

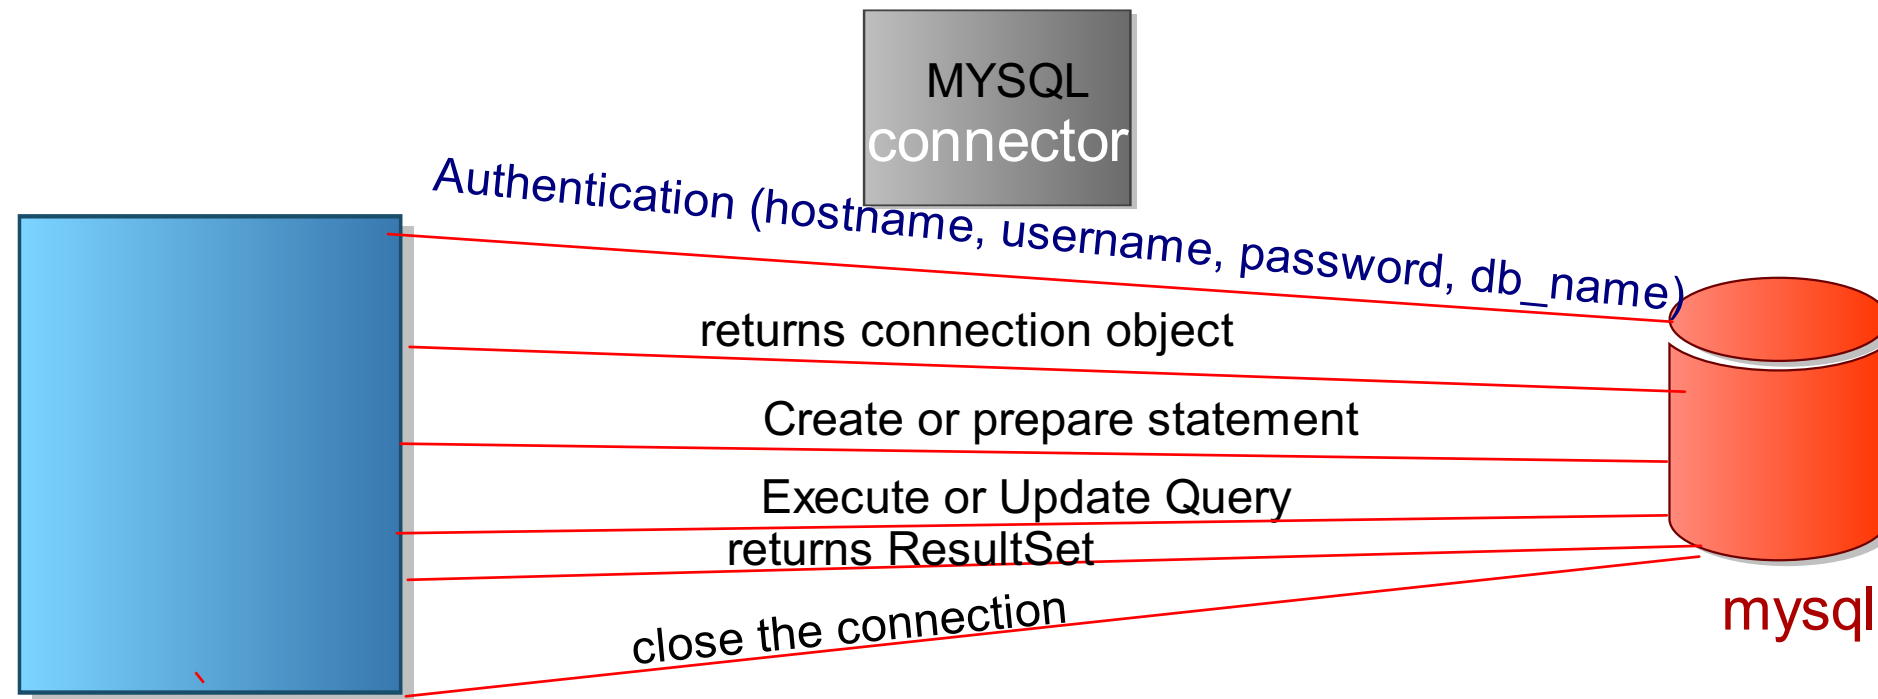

`add(Element e);`
`remove();`
`size();`
`get();`

`add(int ind, Element value);`
`get(int index);`
`addFirst(Ele e);`
`getFirst();`
